

Policy Position

March 2019
and challenges that must be addressed to achieve clean and plentiful water for all, and outline actions needed to do this.

1. Engage people across the world about the challenges faced
2. Regulate and legislate to ensure best practice for chemicals of concern.
3. Invest in research and innovation (R&I) to tackle the problems associated with achieving clean and plentiful water.
4. Government and water companies must take action
5. Government and water companies must take action
6. Effective monitoring strategies looking for trends
