ROENTGENIUM

Rg

111

[280]

NAME

Roentgenium is named after the German physicist Wilhem Röntgen, who discovered X-rays.

COLOUR

Roentgenium is predicted to be silver in colour – though it's unlikely it will ever be directly observed.

SHORT-LIVED

Roentgenium's longest-lived isotope has a half-life of 100 seconds. It has no uses outside research.
